

Zebra Workcloud Communication™

Help workers solve problems on the spot. Put answers at their fingertips and co-workers and customers within their reach. Connect people, data and workflows for a smarter, more responsive operation.

Create a Smart, Connected Workplace

Improve employee efficiency and enhance customer service with the fully scalable Workcloud Communication solution. Connect front-line employees so they can coordinate and collaborate across spaces small or large.

Retail	Healthcare	Manufacturing
 <p>Easily answer customer questions and locate products with dynamic collaboration between the front and back of the store.</p>	 <p>Respond to patients faster with staff location tracking to quickly get essential and qualified caregivers on the scene.</p>	 <p>Prioritize safety with critical real-time alerts and alarm notifications such as Drop Detection and duress signals.</p>
 <p>Meet demand for Buy On-Line Pick-Up in Store (BOPIS), curbside pickup and on-demand assist with the tap of a button.</p>	 <p>Keep employees safe with emergency calling, duress features and location services to see where everyone is.</p>	 <p>Optimize delivery times by rerouting drivers to meet customers' delivery expectations.</p>
 <p>Satisfy employees by giving them the ability to work multiple roles using preloaded profiles. Protect your staff by notifying others of emergencies via calling and alert features.</p>	 <p>Offer staff flexibility to work in multiple departments and roles with secure access and device sharing capabilities.</p>	 <p>Simplify communications by sending instant alerts about new priorities and broadcasting messages to your entire team at once.</p>

Faster Communication, Easier Collaboration

With the power of Workcloud Communication, use one platform on a single device to keep communication secure and reliable, ensure workflows are intact and minimize disruption on the front line. Broadcast messages to everyone in an instant, and give teams all the communication options they need to stay in touch and focused on the job.

Workcloud Communication PTT Express:

The cost-effective solution with simple communication capabilities to connect workers and broadcast messages, instantly. **Push-to-Talk:** Connect associates at the push of a button using WiFi networks **Made for Android™:** Adopt easily on your Zebra Android devices **Fast Deployment:** Use right from the box with no server or PBX integration required **Protect Calls:** Keep calls secure with enterprise-grade security **Cross-Device Communication:** Connect and communicate between departments and on different types of Zebra mobile computers

Workcloud Communication PTT Pro:

The feature-rich solution that enables greater collaboration by turning your front line's mobile devices into mobile computing and communication devices.

Push-to-Talk: Access reliable, instant PTT calling and multimedia messaging between individuals and groups/teams using cellular data or Wi-Fi™

Enterprise-Grade Communication: Get faster, more efficient and secure communications on a trusted solution, rather than relying on personal devices

Bring Your Own Device: Run on your own Zebra Android devices or add to a third-party iOS®/Android device or Windows® desktop

GPS: Track and locate workers near and far, in the aisle or out in the field

Emergency Alert Prioritization: Send emergency alerts, overriding any calls in progress, to reach every employee at once

Hands-Free Communication: Drive productivity by enabling workers to communicate without touching their mobile devices

IoT Integration Service: Connect sensors to staff devices, pushing automatic alerts about customer assistance, product issues and more

Identity Provider (IDP): An add-on that empowers teams with a user authentication provider, enhancing security and privacy

Workcloud Communication PTT Premium:

A powerhouse combination of Workcloud Communication PTT Pro and Workcloud Communication Profile Manager, providing employees with maximum flexibility for work and role selection.

Push-to-Talk: Access reliable, instant PTT calling and multimedia messaging between individuals using cellular data or Wi-Fi

Enterprise-Grade Communication: Get faster, more efficient and secure communications on a trusted solution, rather than relying on personal devices

GPS: Track and locate workers near and far, in the aisle or out in the field

Role Selection: Provide teams with the flexibility to work across roles and departments with multi-user role selection on a shared device

Device Sharing: Share devices with multiple employees and automatically configure each to match the individual worker's role and needs

Configurable: Customize rules for each role, control feature access and more

Workcloud Communication Enterprise Voice:

Powerful PBX-based voice calling features on Zebra mobile devices give employees the ability to connect and collaborate anywhere, without being tethered to their workstations.

Easy Implementation: Plug into existing infrastructure for quick, easy deployment

Advanced Extension Management: Assign incoming calls based on role for fast, accurate responses from the right employee

Intuitive: Save time on training and onboarding with simplified PBX features such as the ability to manage up to four different extensions, join different departments or select multiple roles on the fly

Customize Your Way: Design the interface to work best for your teams with the features and PBX functions that align with your organization

All-in-One Solution:

The complete solution packed with all the functions and features of Workcloud Communication PTT Premium and Workcloud Communication Enterprise Voice.

Powerful Combination: Create synergies and unlock untapped potential when you combine Workcloud Communication PTT Premium and Workcloud Communication Enterprise Voice on one integrated communication platform

Device Sharing: Share devices with multiple employees and automatically configure each to match the individual worker's role and needs

PBX Integration: Minimize hold times and speed up workflows by automatically routing incoming calls to the right department or specific person with the Voice add-on

Configurable: Customize rules for each role, control feature access and more
